

Assignment-9

TOPIC:WEBSITE CONTACT PAGE-USER INTERFACE

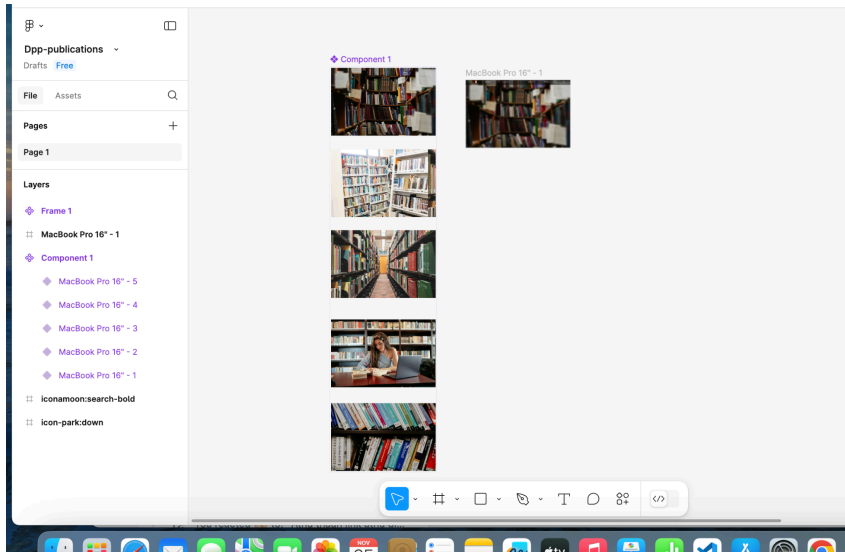

AIM:

To design and develop a simple and functional contact page that allows users to communicate with the website owner or organization for inquiries, support, or feedback.

PROCEDURE:

1. Plan the structure of the contact page.
2. Create an HTML file and set up a basic layout.
3. Add a header or title indicating it is a contact page.
4. Insert form elements like input fields for name, email, subject, and message.
5. Add a submit button to the form.
6. Include placeholder text or labels for clarity.
7. Use HTML attributes like `required` and `type="email"` for validation.
8. Test the form to ensure all fields function properly.

OUTPUT:

RESULT:

A fully functional contact page that allows users to submit their information or queries successfully.
