

Assignment-6

TOPIC:WAYANAD DONATION PAGE-WEB USER INTERFACE

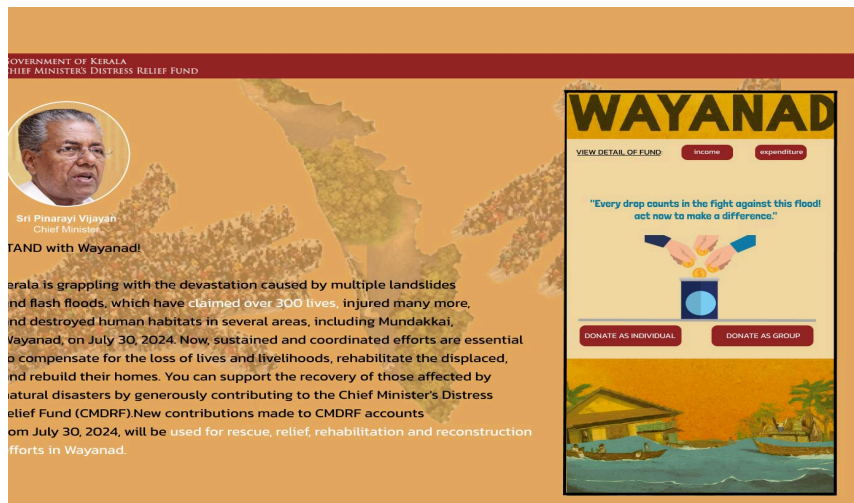

AIM:

To design an engaging and user-friendly interface for a **Wayanad Donation Website** that enables users to easily contribute towards the development of Wayanad, ensuring a seamless and trustworthy experience for donors.

PROCEDURE:

- 1.Research user needs and expectations for a donation website by analyzing similar platforms and conducting surveys.
- 2.Define the key features, such as donation categories, payment integration, and donor recognition sections.
- 3.Design wireframes to outline the structure of the homepage, donation process, and information pages.
- 4.Develop high-fidelity prototypes using tools like Figma, ensuring the design is visually appealing and responsive.
- 5.Conduct usability testing to identify and resolve any issues in navigation or layout.
- 6.Finalize the design by incorporating feedback, ensuring simplicity, security, and clarity in the UI.

OUTPUT:

RESULT:

The UI design provides an accessible platform for users to make donations effortlessly, with clear navigation and secure payment options. It ensures transparency and builds trust through features like progress tracking and donor acknowledgments. The final design meets user needs while promoting the cause effectively.
