

EXPERIMENT: 1 Develop and design web application to change background color and menus.

[31/07/2024]

AIM:

To develop and design the mobile or web application to change the background colors and menu.

PROCEDURE:

- 1.Find the suitable mobile or web application to replicate its elements and design.
- 2.Create the frame in required width and height.
- 3.Create the Basic elements and adjust its borders as per the dimensions.
- 4.Align the text in suitable format and size, that should be in professional way.
- 5.Add the background colors based on the color theory.
- 6.Use the plugins to symbolical representation and export the output in required formats like PNG,JPEG,PSD,TIFF,etc.,

OUTPUT:**RESULT:**

The web application is created and the background color is changed successfully.
